SUMMARY

Undergraduate pursuing a Double Degree in Informatics (UII) and Software Engineering (Nanjing Xiaozhuang University). Web developer focused on frontend (React, Next.js, TypeScript, Tailwind CSS), with backend experience in Node.js, PHP, and PostgreSQL. Experienced in API integration, UI/UX design with Figma, and cross-functional team collaboration across academic and professional settings.

EXPERIENCE

IT Manager
Hellocation (Jan 2026 - Present)

- Restructured the IT division into Development and Support squads, giving each team clearer ownership and a faster path from request to delivery.
- Led the redesign of hellocation.id from Figma concept to WordPress staging and launch, coordinating a remote team of 6 designers and developers.
- Managed on-page SEO on WordPress (meta titles and descriptions, sitemap, Search Console) and used Google Analytics to monitor site traffic and guide redesign priorities.
- Set up Notion workflows for task tracking and monthly KPIs, and ran team kickoff and onboarding for new intern batches.
- Served as the link between the IT team and C-level executives, aligning technical plans with business goals and handling server and website issues to keep the site running.

Frontend Web Developer
Kelas Kampus (Jul 2026 - Oct 2026)

- Rebuilt Kelas Kampus's website front end using Next.js, TypeScript, Tailwind CSS, and Framer Motion, migrating legacy pages to a modern, component-based architecture.
- Integrated the frontend with backend services via REST API to fetch and manage platform content and data.
- Built a design system covering reusable components, typography, spacing, and color tokens to keep the UI consistent across the platform.
- Collaborated remotely with the Kelas Kampus team as part of Batch 8, translating product and content requirements into responsive, production-ready interfaces.

Web Developer
Jamusari Cafe (Aug 2025 - Nov 2025)

- Built jamusari.com end to end with WordPress and Elementor, handling hosting, domain setup on Hostinger, and deployment independently.
- Designed a responsive interface for the “Modern Jamu” brand, with custom layouts for product catalogs, educational blogs, and conservation galleries.
- Implemented on-page SEO and curated all digital assets to support search visibility and performance across devices.
- Gathered and structured all site content to present the PPK Ormawa TOGA conservation program in Desa Guwosari.
- Set up the site so non-technical staff can update content without developer help.

Software Engineering Course Teaching Assistant
Islamic University of Indonesia (Mar 2025 - Aug 2025)

- Assessed and provided constructive feedback on student assignments to help them avoid repeating mistakes.
- Assisted students in understanding course material and assignments through responsive and clear communication.

Data Structures and Algorithms Laboratory Assistant
Integrated Informatics Laboratory (Mar 2025 - Aug 2025)

- Supported 30+ students enrolled in the Data Structures and Algorithms course during weekly lab sessions.
- Reviewed and graded coding assignments, providing guidance for logical structuring and efficiency improvements.
- Delivered explanations and hands-on assistance during labs to reinforce students’ understanding of algorithmic concepts and programming techniques.

UI/UX Designer
HelloCation Korea (Mar 2025 - Jun 2025)

- Redesigned the entire HelloCation website, including the Home, About Us, Services, News, and Contact pages, focusing on modern layouts, improved visual hierarchy, and consistent branding.
- Enhanced page structures with clearer navigation, optimized content presentation, and refined section organization, such as hero banners, service listings, article layouts, and contact forms.
- Ensured responsive, user-friendly interfaces across all pages using Figma and current UI/UX design principles.

IT Support
HelloCation Korea (Oct 2024 - Feb 2025)

- Provided technical support, focusing on Zoom-related issues.
- Managed live streaming of events across social media platforms, ensuring professional broadcast quality.
- Analyzed social media engagement metrics to optimize content strategies.

PROJECTS

MOINK - Fullstack Web Developer
Personal Project (Sep 2026 - Present)

- Built a Chinese vocabulary learning platform with Next.js, TypeScript, and Tailwind CSS, covering HSK 1 to 4 vocabulary sourced from the CC-CEDICT dictionary.
- Designed radical-based vocabulary grouping and three quiz modes to help learners build and review vocabulary for HSK exam preparation.
- Implemented user authentication with Firebase Auth and stored learning data across Firestore and Supabase (PostgreSQL).
- Created an ink and calligraphy-inspired interface with Framer Motion animations and the Canvas API, designing and shipping the full product from UI to deployment on Vercel.

Kelas Kampus Website - Frontend Web Developer
Kelas Kampus (Jul 2026 - Oct 2026)

- Rebuilt core pages of Kelas Kampus's website, an education platform for university entrance exam prep and campus life content, using Next.js, TypeScript, and Tailwind CSS.
- Established a reusable design system, including component library and style tokens, to standardize UI across the platform and speed up future development.
- Improved page structure and responsiveness to support Kelas Kampus's growing student user base.

Wandr - iOS Developer
Nanjing Xiaozhuang University (2026)

- Built a full-featured iOS travel companion app using SwiftUI, Firebase, ARKit, MapKit, and Core ML.
- Architected eight AI agents (via Groq and Gemini) to power personalized itinerary generation and in-app travel assistance.
- Implemented AR landmark scanning and food scanning features, using ARKit and Core ML for real-time on-device recognition.

KinetiQ - iOS Developer
Nanjing Xiaozhuang University (2026)

- Built a SwiftUI iOS app integrated with HealthKit for real-time fitness data collection and health permission management.
- Architected a multi-agent crewAI backend (UIAgent, HealthKitAgent, QAAgent) using Python with Groq's LLaMA 3.3 70B via an OpenAI-compatible endpoint.
- Coordinated AI agent outputs as structured input for Swift frontend logic via AgentCoordinator.swift.

JAMUSARI - Web Developer
Jamusari Cafe (Aug 2025 - Nov 2025)

- Spearheaded the end-to-end development of jamusari.com using WordPress, managing server hosting, domain configuration via Hostinger, and final deployment independently.
- Designed a responsive, culturally relevant user interface to digitize the "Modern Jamu" brand, creating custom layouts for product catalogs, educational blogs, and conservation galleries.
- Translated the PPK Ormawa community empowerment mission into a cohesive digital narrative, gathering and structuring all content to promote TOGA conservation efforts in Desa Guwosari.

HealthSync - Web Developer
SE7EN (Mar 2025 – Jul 2025)

- Led the development of a healthcare platform using Next.js, Supabase, and PostgreSQL to integrate electronic health records and cross-facility data.
- Integrated the Google Generative AI SDK to build an intelligent health chatbot and diagnostic assistant, providing real-time support for patients.
- Engineered a real-time queuing system and role-based access control (RBAC) to streamline hospital workflows for doctors and administrators.

WETRACK - Web Developer
BYTE ME (Sep 2024 - Jan 2025)

- Developed a web-based monitoring system using PHP, MySQL, and JavaScript to track ex-prisoners and monitor compliance before full release.
- Implemented location tracking and geofencing with Leaflet to alert authorities of boundary violations.
- Designed a role-based, multi-user architecture that lets different authorities securely access and manage sensitive tracking data.

AquaLink - Software Developer
CodeCraftCrew (Mar 2024 - Jul 2024)

- Led the development of a Java-based application utilizing an XML database to address SDG6 (Clean Water & Sanitation) challenges.
- Designed a multi-user reporting system to enable real-time tracking and resolution of sanitation issues within the community.
- Developed the core project architecture and produced promotional materials, including posters and videos, to drive user awareness.

EduNovel - UI/UX Designer
EduConnect (Sep 2023 - Jan 2024)

- Designed the user interface for an interactive educational app, using gamification elements to encourage student engagement.
- Improved accessibility and usability for both students and educators through user-centered design.
- Created visual assets and promotional content to support the app's launch and marketing.

EDUCATION

2025 - Present
Software Engineering
Nanjing Xiaozhuang University (NJXZ) | Nanjing, China
Double Degree Partner Institution

2023 - Present
Informatics
Islamic University of Indonesia (UII) | Yogyakarta, Indonesia
Double Degree Program with Nanjing Xiaozhuang University

2020 - 2023
Mathematics and Natural Sciences
SMA N 1 Purworejo | Central Java, Indonesia

SKILLS

Technical Skills

- Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Framer Motion
- Backend: Node.js, Express, PHP, REST API
- Database: PostgreSQL, MySQL, Supabase, Firebase (Auth, Firestore)
- Mobile: Swift, SwiftUI, ARKit, Core ML
- AI Integration: Google Gemini, Groq (LLaMA), crewAI
- Web & CMS: WordPress, Elementor, SEO, Google Analytics
- Programming Languages: Java, Python
- Tools: Git, GitHub, Vercel, Figma, Notion

Soft Skills

- Project Management
- Teamwork & Collaboration
- Leadership & Mentoring
- Problem-Solving & Innovation
- Effective Communication
- Discipline & Precision

Languages

- Indonesian & Javanese: Native
- English: Professional Working Proficiency
- Chinese: Elementary Proficiency
